Here are some highlights:

[SciGuides](#)

SciGuides is an online "science toolbox" for science educators. It features specially developed guides to quickly locate science content information on the web. Each subject-specific SciGuide includes teaching resources from NSTA-reviewed science web sites. NSTA says teachers can use SciGuides to transform content offered on the site into effective classroom resources by locating and incorporating online lesson plans, tips for teaching the subject matter, and effective student assessments.

[Utopia](#)

UTOPIA is your access point to the vast resources of The University of Texas at Austin. Teachers will find TEKS aligned lesson plans and activities..
